hr731977@gmail.com — +91-7319776084 — [github.com/himanshuranjan007](https://github.com/himanshuranjan007)

Chandigarh, India

## Professional Summary

Aspiring full-stack developer proficient in JavaScript, Data Structures Algorithms (DSA), and backend development with Node.js. Actively expanding expertise in Web3 technologies, Solidity smart contract development, and blockchain-based solutions. Skilled in integrating Firebase with Go and passionate about 3D modeling, design, and animation. Dedicated to creating secure, scalable, and innovative applications.

## Technical Skills

- **Languages:** JavaScript, Go, Solidity
- **Backend:** Node.js, Express.js
- **Frontend:** React.js
- **Web3:** Smart Contracts (Solidity), Blockchain Integration (Base Network)
- **Database:** Firebase, PostgreSQL
- **Version Control:** Git (HTTPS)

## Projects

### Web3 NFT Marketplace on Base

Backend Developer & Smart Contract/Web3 Integration

- Developed smart contracts in Solidity for secure NFT minting and trading.
- Implemented pre-minting of whitelist tokens for low-cost, secure trading.
- Integrated Web3 functionalities for seamless blockchain interactions.

### HackTheCrowd

Backend Developer

- Built a crypto-based crowdfunding platform supporting Solana with potential for multi-chain expansion.
- Designed secure, scalable backend solutions to handle crypto transactions.

## Education

### Bachelor of Engineering (B.E.) – Computer Science Engineering

Chandigarh University — [2024-2028]

## Personal Projects & Interests

- Exploring 3D Modeling, Design, and Animation.
- Developing applications for a decentralized future.
